

Connekt is the premier network for mobility and logistics, fostering collaborative efforts toward innovation and sustainable accessibility.

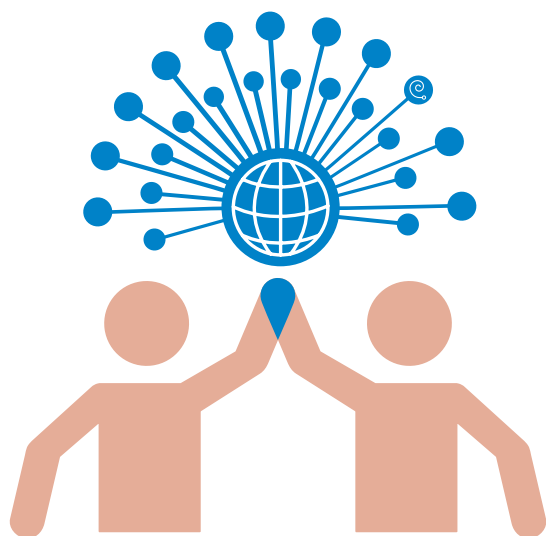

## Connekt

Connekt operates as an independent non-profit network in the Netherlands, focused on stimulating innovations in sustainable mobility and logistics.

Our mission is:

- connecting people, governments and organizations;
- sharing knowledge;
- initiating and executing programs and projects that contribute to advancing sustainable mobility and logistics.

With a focus on networking and execution skills, two qualities nurtured within our membership network and programs, we are actively involved in creating a positive societal impact.

## What are the benefits of joining Connekt?

Within the Connekt network, information and knowledge are exchanged, creating new opportunities and possibilities. As a member of Connekt, you have access to this network: a mix of knowledge, creativity, and ambitious resolve.

Connekt possesses the ability to recognize needs and trends and transform them into collaborative efforts. Additionally, Connekt acts as a neutral connector, addressing challenges that one member alone may not be able to address. We help wherever we can.

- One central place
- Analyzing developments
- Together, we are strong
- A wealth of information

# What more does Connekt offer?

## Initiatives

### Smart Mobility Embassy

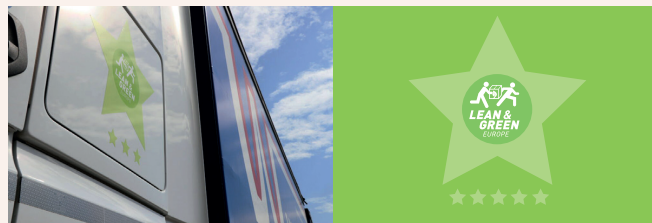

The Smart Mobility Embassy forms the international community of Connekt. Through the Smart Mobility Embassy, Connekt members establish connections reaching nearly every corner of the globe. Connekt invests in the organization of the international community through the Smart Mobility Embassy, creating export opportunities and exchanging knowledge and experiences to expand and strengthen the Dutch ecosystem of sustainable mobility internationally. The Smart Mobility Embassy receives inquiries and requests from all over the world. These are addressed together with the network of partner organizations and government.

Additionally, the Smart Mobility Embassy, together with the network, organizes study trips, webinars, and strategic knowledge exchange sessions for its participants and members of Connekt.

### Lean & Green

Lean & Green provides participating companies with verified recognition (Stars) for the CO<sub>2</sub> reduction they achieve in their logistic activities. Participants follow the 5-Star Framework by developing a CO<sub>2</sub> reduction plan and measuring and monitoring CO<sub>2</sub> emissions annually. It fosters a diverse network of participating companies striving for efficient and sustainable logistics. Within this network, companies are willing to engage in new collaborations, share knowledge and successes, and stay updated on the latest developments and innovations within the sector.

## Connekt programmes

In addition to organizing activities with and for its members, Connekt implements various programs commissioned by different ministries. Additionally, Connekt initiates several independent initiatives under its own direction.
